Installing UMF for Windows

1. Download UMF

- **2.** Extract the zip file anywhere and start the **UMF.Installer.exe** by double clicking it.
 - If the installer gives you an error, then you are missing .NET 4.7.2. Download .NET 4.7.2

- 3. Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".
 - Note: If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.

2025/11/09 09:13 3/11 Install Guide

4. Select your game from the drop down list and click "Install".

- 5. Click "Next" and then click "Exit".
 - You have now installed UMF can can start Installing Mods.

2025/11/09 09:13 5/11 Install Guide

- 6. (OPTIONAL) Install the latest Mono for Windows: Mono for Windows
 - This step is only required if you wish to run mods straight from their source files.
 - The 64bit version is recommended. Do not change the install path for mono.

Installing Mods for Windows

If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.

1. Find a mod that you want.

Official Mod List

Automatic Install:

- 2. Click the Install link or button for the mod.
 - The first time you will need to set your browser to always open those Install links with UMF.
 - If there is no Install link then follow the Manual Install steps.

Manual Install:

- 2. Download the mod to your computer.
- **3.** Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)
 - If the mod is in a zip file you **should not extract** it, UMF will do this for you.

2025/11/09 09:13 7/11 Install Guide
