Installing UMF for Windows

1. [Download UMF](#)

2. Extract the zip file anywhere and start the **UMF.Installer.exe** by double clicking it.

- If the installer gives you an error, then you are missing .NET 4.7.2. [Download .NET 4.7.2](#)

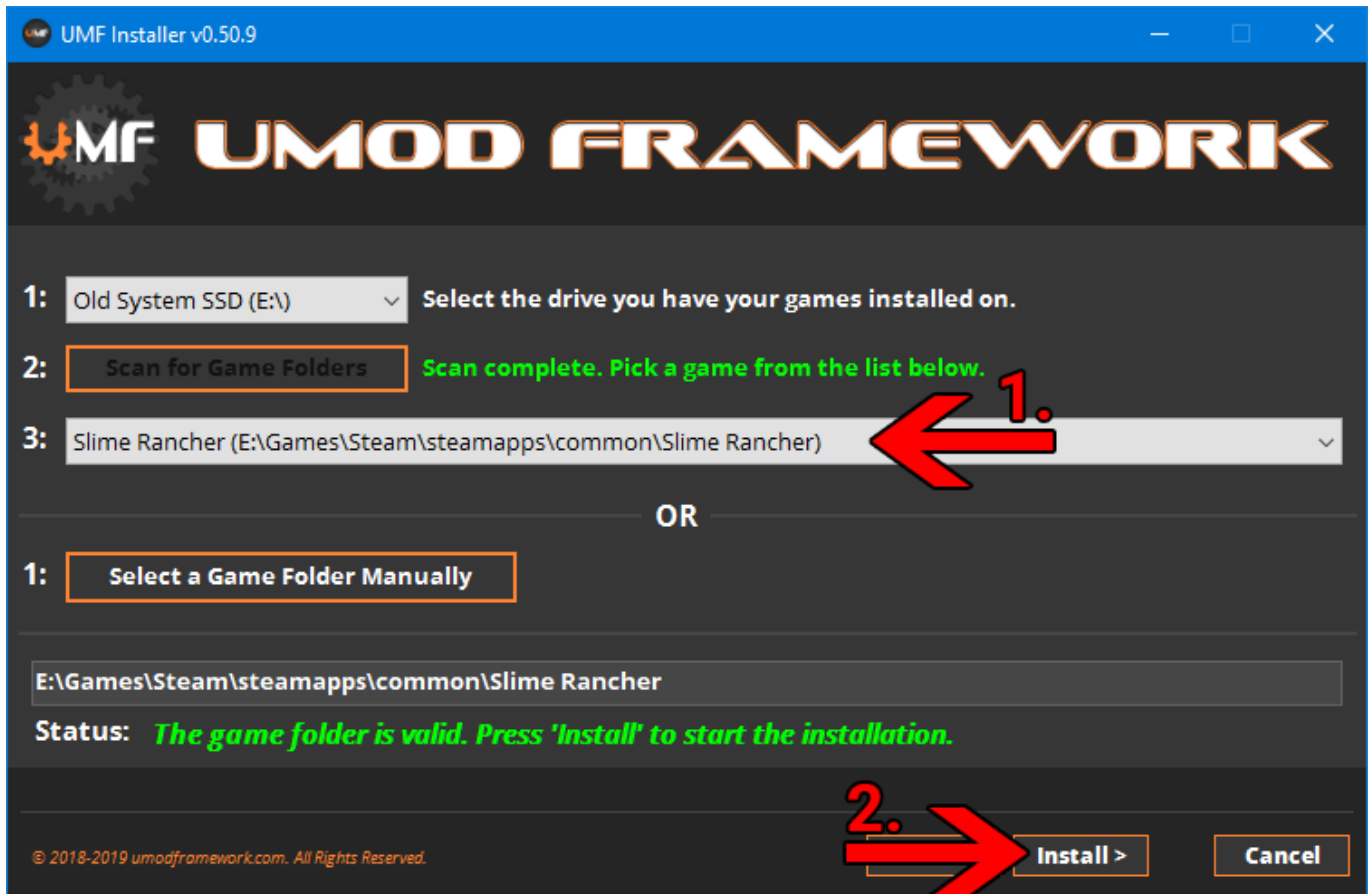

3. Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".

- Note: If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.

4. Select your game from the drop down list and click "Install".

5. Click “Next” and then click “Exit”.

- You have now installed UMF can can start [Installing Mods](#).

6. (OPTIONAL) Install the latest Mono for Windows: [Mono for Windows](#)

- This step is only required if you wish to run mods straight from their source files.
- The 64bit version is recommended. Do not change the install path for mono.

Installing Mods for Windows

If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.

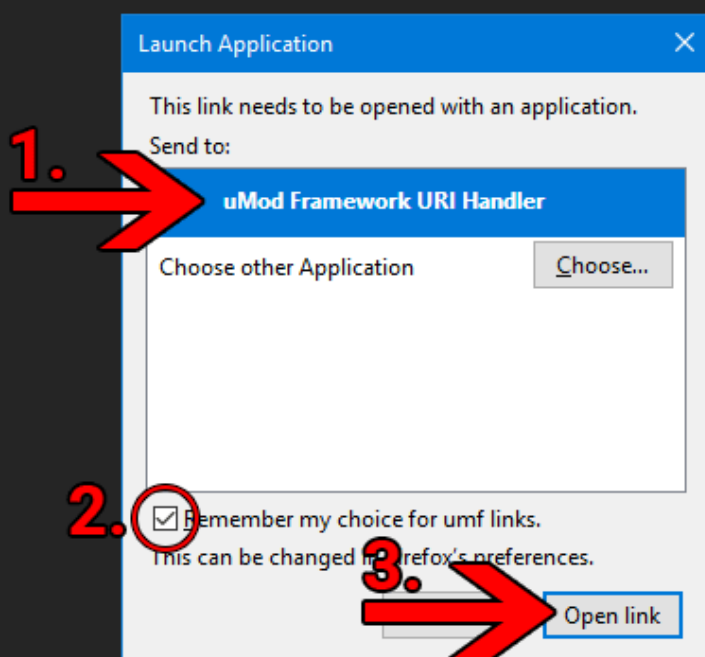

1. Find a mod that you want.

[Official Mod List](#)

Automatic Install:

2. Click the Install link or button for the mod.

- The first time you will need to set your browser to always open those Install links with UMF.
- If there is no Install link then follow the Manual Install steps.

Mozilla Firefox

Manual Install:

2. Download the mod to your computer.

3. Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)

- If the mod is in a zip file you **should not extract** it, UMF will do this for you.

Uninstalling UMF for Windows

Windows 10:

1. Open Apps & Features
2. Select "UMF (Game Name)"
3. Click Uninstall

Other Windows Versions:

1. Open Control Panel
2. Open Programs & Features
3. Select "UMF (Game Name)"
4. Click Uninstall

Alternative:

1. Open the \Game Folder\umodframework\ folder in the Game Folder where UMF was installed.
 2. Double click Uninstall.exe
-

Installing UMF for Linux

1. Download UMF

2. Extract the zip file anywhere and start the **UMF.Installer(.desktop)** by double clicking it.

- If you do not have mono you will be taken to a download page for mono.
- You can alternatively install the mono-complete package through a repository.

3. Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".

- Note: If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.

4. Select your game from the drop down list and click "Install".

5. Click "Next" and then click "Exit".

- You have now installed UMF can can start [Installing Mods](#).

Installing Mods for Linux

If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.

1. Find a mod that you want.

[Official Mod List](#)

Automatic Install: (Not yet available for Linux)

2. Click the Install link or button for the mod.

- The first time you will need to set your browser to always open those Install links with UMF.
- If there is no Install link then follow the Manual Install steps.

Manual Install:

2. Download the mod to your computer.

3. Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)

- If the mod is in a zip file you **should not extract** it, UMF will do this for you.

Uninstalling UMF for Linux

Main:

1. Open the /Game Folder/uModFramework/ folder in the Game Folder where UMF was installed.
2. Double click Uninstall(.desktop)

Alternative:

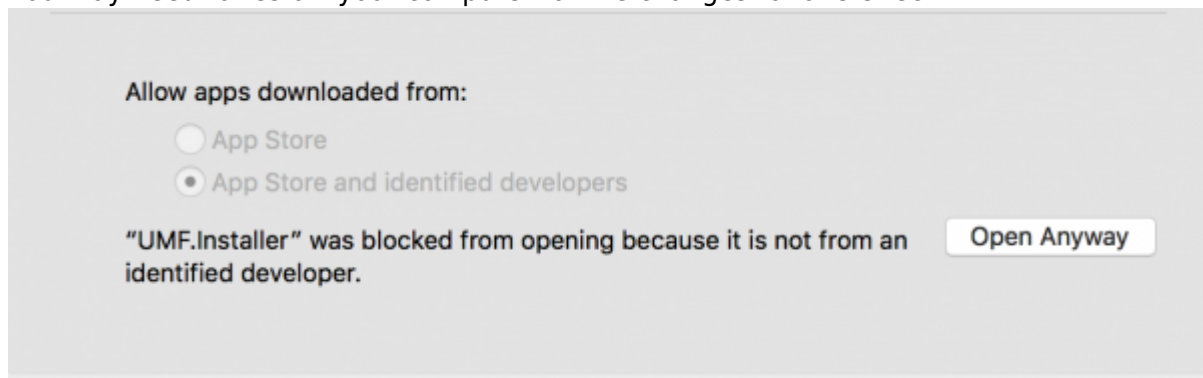

1. Open a Terminal type `cd /Game Folder/uModFramework/` then press enter. (Full path to where UMF is installed.)
 2. Type `mono Uninstall.exe` and press enter/return.
-

Installing UMF for MacOS

1. Download UMF

2. Extract the zip file to your Desktop and start the **UMF.Installer(.app)** by double clicking it.

- In your Security & Privacy panel you may need to choose Open Anyway for the UMF.Installer.
- If you do not have mono you will be taken to a download page for mono.
- You may need to restart your computer for the changes to take effect.

•

•

3. Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".

- If mouse input is not working for you, you can use Tab, Arrow Keys, and Enter to select. (Don't buy a Mac next time.)
- If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.
- 
- 

4. Select your game from the drop down list and click "Install".

5. Click "Next" and then click "Exit".

- You have now installed UMF can can start [Installing Mods](#).

Command Line Install

If you have issues with the GUI Installer you can also install UMF using a Terminal.

1. Place the UMF.Installer(.app) on your desktop.
2. Use the -install "path" parameter to install.
 - `cd ~ && cd "Desktop/UMF.Installer.app/Contents/MacOS/" && mono UMF.Installer.exe -install "/PATH/TO/GAME/FOLDER"`
 - **EXAMPLE:** `cd ~ && cd "Desktop/UMF.Installer.app/Contents/MacOS/" && mono UMF.Installer.exe -install ~/"Library/Application Support/Steam/steamapps/common/Slime Rancher/"`

Installing Mods for MacOS

~~If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.~~

1. Find a mod that you want.

[Official Mod List](#)

Automatic Install: (Not yet available for MacOS)

2. ~~Click the Install link or button for the mod.~~

- ~~The first time you will need to set your browser to always open those Install links with UMF.~~
- ~~If there is no Install link then follow the Manual Install steps.~~

Manual Install:

2. Download the mod to your computer.

3. Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)

- If the mod is in a zip file you **should not extract** it, UMF will do this for you.

Uninstalling UMF for MacOS

Main:

1. Open the /Game Folder/uModFramework/ folder in the Game Folder where UMF was installed.
2. Double click Uninstall(.app)
3. In your Security & Privacy panel choose Open Anyway for the Uninstall.app.

Alternative:

1. Open a Terminal and type `cd /Game Folder/uModFramework/` then press enter. (Full path to where UMF is installed.)
2. Type `"mono Uninstall.exe"` and press enter.

Default Controls

These default controls can be changed in the UMF Menu.

Shift + F10 = Open the UMF Menu (Change settings for mods here.)
Shift + ~ = Open the Console (Type help in console for a list of console commands.)

Note: ~ (Tilde) is the key above Tab on all keyboards regardless of language.
