# Installing UMF for Windows

**1. Download UMF**

**2.** Extract the zip file anywhere and start the **UMF.Installer.exe** by double clicking it.

- If the installer gives you an error, then you are missing .NET 4.7.2. Download .NET 4.7.2
**Windows Explorer**

**3.** Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".
- Note: If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.

**4.** Select your game from the drop down list and click "Install".

**5.** Click "Next" and then click "Exit".

- You have now installed UMF can can start **Installing Mods**.

**6. (OPTIONAL)** Install the latest Mono for Windows: **Mono for Windows**

- This step is only required if you wish to run mods straight from their source files.
- The 64bit version is recommended. Do not change the install path for mono.

# Installing Mods for Windows

If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.
**1.** Find a mod that you want.

- Official Mod List

**Automatic Install:**
**2.** Click the Install link or button for the mod.

- The first time you will need to set your browser to always open those Install links with UMF.
- If there is no Install link then follow the Manual Install steps.
**Manual Install:**

**2.** Download the mod to your computer.

**3.** Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)

- If the mod is in a zip file you **should _not_ extract** it, UMF will do this for you.

## Uninstalling UMF for Windows

### Windows 10:

1. Open Apps & Features
2. Select "UMF (Game Name)"
3. Click Uninstall

### Other Windows Versions:

1. Open Control Panel
2. Open Programs & Features
3. Select "UMF (Game Name)"
4. Click Uninstall

### Alternative:

1. Open the `\Game Folder\uModFramework\` folder in the Game Folder where UMF was installed.
2. Double click Uninstall.exe

# Installing UMF for Linux

**1. Download UMF**

**2.** Extract the zip file anywhere and start the **UMF.Installer(.desktop)** by double clicking it.

- If you do not have mono you will be taken to a download page for mono.
- You can alternatively install the `mono-complete` package through a repository.
- 
- 

**3.** Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".

- Note: If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.
- 
- 

**4.** Select your game from the drop down list and click "Install".

- 

**5.** Click "Next" and then click "Exit".

- You have now installed UMF can can start **Installing Mods**.
- 
- 

# Command line Linux

If you have issues with the GUI Installer you can also install UMF using a Terminal.

1. Extract the Installer on your desktop.
2. Use the `-install` "path" parameter to install.
   - `cd ~ && cd "Desktop/UMF.Installer/" && mono UMF.Installer.exe -install "/PATH/TO/GAME/FOLDER/"`
3. You may need to also use `chmod -R +rwx "/PATH/TO/GAME/FOLDER/"` in order to give full permissions.

# Installing Mods for Linux

~~If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.~~

**1.** Find a mod that you want.

- Official Mod List

~~**Automatic Install:**~~ **(Not yet available for Linux)**
~~**2.** Click the Install link or button for the mod.~~

- ~~The first time you will need to set your browser to always open those Install links with UMF.~~
- ~~If there is no Install link then follow the Manual Install steps.~~
- 
- 

**Manual Install:**
**2.** Download the mod to your computer.

**3.** Drag and drop the mod into the Mods folder of UMF. (You can find a shortcut to the Mods folder on your desktop.)

- If the mod is in a zip file you **should <u>not</u> extract** it, UMF will do this for you.

—-

## Uninstalling UMF for Linux

### Main:

1. Open the `/Game Folder/uModFramework/` folder in the Game Folder where UMF was installed.

---

# Installing UMF for MacOS

### 1. Download UMF

**2.** Extract the zip file to your `Desktop` and start the **UMF.Installer(.app)** by double clicking it.

- In your Security & Privacy panel you may need to choose `Open Anyway` for the UMF.Installer.
- If you do not have mono you will be taken to a download page for mono.
- You may need to restart your computer for the changes to take effect.

-

Allow apps downloaded from:

○ App Store
● App Store and identified developers

"UMF.Installer" was blocked from opening because it is not from an identified developer.

Open Anyway

**3.** Click Next and Select the drive your game is installed on, then click "Scan for Game Folders".

- If mouse input is not working for you, you can use Tab, Arrow Keys, and Enter to select. (Don't buy a Mac next time.)
- If you know where your game is installed you can click "Select a Game Folder Manually" instead of using scan to find it.
- 
- 

**4.** Select your game from the drop down list and click "Install".

- 

**5.** Click "Next" and then click "Exit".

- You have now installed UMF can can start **Installing Mods**.
- 
- 

# Command line MacOS

If you have issues with the GUI Installer you can also install UMF using a Terminal.

1. Place the UMF.Installer(.app) on your desktop.
2. Use the `-install` "path" parameter to install.
   - `cd ~ && cd "Desktop/UMF.Installer.app/Contents/MacOS/" && mono UMF.Installer.exe -install "/PATH/TO/GAME/FOLDER/"`
   - **Default Slime Rancher Steam Example:** `cd ~ && cd "Desktop/UMF.Installer.app/Contents/MacOS/" && mono UMF.Installer.exe -install ~/"Library/Application Support/Steam/steamapps/common/Slime Rancher/"`
   - **Default Slime Rancher Epic Example:** `cd ~ && cd "Desktop/UMF.Installer.app/Contents/MacOS/" && mono UMF.Installer.exe -install "/Users/Shared/Epic Games/SlimeRancher/"`
3. You may need to also use `chmod -R +rwx "/PATH/TO/GAME/FOLDER/"` in order to give full

permissions.

# Installing Mods for MacOS

~~If the mod you want has a UMF Install link or button you can click that and the mod is automatically downloaded and installed for you.~~

**1.** Find a mod that you want.

# Uninstalling UMF for MacOS

**Main:**

1. Open the `/Game Folder/uModFramework/` folder in the Game Folder where UMF was installed.
2. Double click Uninstall(.app)
3. In your Security & Privacy panel choose `Open Anyway` for the Uninstall.app.

**Alternative:**

1. Open a Terminal and type `cd /Game Folder/uModFramework/` then press enter. (Full path

to where UMF is installed.)

2. Type ''mono Uninstall.exe' and press enter.

# Default Controls

These default controls can be changed in the UMF Menu.

```
Shift + F10 = Open the UMF Menu (Change settings for mods here.)
Shift + ~   = Open the Console (Type help in console for a list of console
commands.)

Note: ~ (Tilde) is the key above Tab on all keyboards regardless of
language.
```
